

THE CAMPUS DEVICE REPURPOSING AND EDGE-NODE REGISTRATION REGULATIONS, 2026

Notification No. IT-COMP/07/2026

WHEREAS the Institute recognises that decommissioned mobile handsets and other personal computing devices, if repurposed as distributed computing nodes on the campus network, can materially reduce electronic waste and infrastructure cost; AND WHEREAS it is necessary to regulate such use to protect network security, data privacy, and safety of persons and property; NOW THEREFORE the following Regulations are notified for compliance by all students, staff, and registered clubs.

CHAPTER I PRELIMINARY

1. Short title, extent and commencement. — (1) These Regulations may be called the Campus Device Repurposing and Edge-Node Registration Regulations, 2026. (2) They extend to all departments, hostels, and recognised student clubs of the Institute. (3) They shall come into force on 1st August 2026.

2. Definitions. — In these Regulations, unless the context otherwise requires — (a) “edge node” means any repurposed handset or single-board computer running a local inference, storage, or automation workload and connected to the campus network; (b) “registering authority” means the Campus IT Security Office; (c) “sensitive workload” means any workload that processes personally identifiable data, surveillance footage, or access-control credentials.

CHAPTER II REGISTRATION AND OPERATING CONDITIONS

3. Mandatory registration. — (1) No person or club shall operate more than two edge nodes on the campus network without prior registration with the registering authority. (2) An application for registration shall be submitted in Form ER-1 at least seven working days before deployment and shall be either approved or rejected within fifteen working days of submission.

4. Network isolation requirement. — Every edge node shall be connected only to the designated IoT-VLAN and shall not be bridged to the administrative or examination network under any circumstance.

5. Power and safety limits. — (1) No edge node cluster shall draw more than 500 watts of continuous power from a single hostel room circuit. (2) Devices with damaged or swollen batteries shall not be used as edge nodes and shall be surrendered to the E-Waste Collection Point within 48 hours of detection.

6. Restrictions on sensitive workloads. — (1) Sensitive workloads shall not be deployed on any edge node unless the node is registered as a Tier-2 node under sub-regulation (2). (2) A Tier-2 registration requires disk encryption, a signed data-handling declaration, and biannual audit by the registering authority.

CHAPTER III PENALTIES AND APPEALS

7. Penalties for non-compliance. — (1) Operation of an unregistered edge node shall attract a written warning on first detection and disconnection from the network on second detection. (2) Operation of a sensitive workload without Tier-2 registration shall attract immediate disconnection and a fine not exceeding Rs. 2,000, to be credited to the Student Welfare Fund. (3) Repeated violation within the same academic year shall be referred to the Disciplinary Committee.

8. Appeal. — Any person aggrieved by an order of disconnection under Regulation 7 may file an appeal to the Dean of Student Affairs within ten working days of such order, and the appeal shall be disposed of within thirty working days.

9. Review. — These Regulations shall be reviewed by the Campus IT Security Office once every two academic years, or earlier if directed by the Institute administration.
